### Highlights of This Issue 1219

### SPOTLIGHT ON CLINICAL RESPONSE

**1221 Overcoming Platinum Resistance through the Use of a Copper-Lowering Agent**  
Siqing Fu, Aung Naing, Caroline Fu, Macus Tien Kuo, and Razelle Kurzrock

**1300 STAT3 Inhibition Overcomes Temozolomide Resistance in Glioblastoma by Downregulating MGMT Expression**  
Shinji Kohsaka, Lei Wang, Kazuhiro Yachi, Roshan Mahabir, Takuhito Narita, Tamio Itoh, Mishie Tanino, Taichi Kimura, Hiroshi Nishihara, and Shinya Tanaka

### REVIEW

**1226 New Directions for Biologic Targets in Urothelial Carcinoma**  
Suzanne Richter and Srikala S. Sridhar

**1320 Combination of Rad001 (Everolimus) and Propachlor Synergistically Induces Apoptosis through Enhanced Autophagy in Prostate Cancer Cells**  
Sheng Tai, Yin Sun, Nan Liu, Boxiao Ding, Elaine Hsia, Sunita Bhuta, Ryan K. Thor, Robert Damoiseaux, Chaozhao Liang, and Jiaoti Huang

### THERAPEUTIC DISCOVERY

**1236 Antitumor Mechanisms of Targeting the PDK1 Pathway in Head and Neck Cancer**  
Neil E. Bholia, Maria L. Freilino, Sonali C. Joyce, Malabika Sen, Sufi M. Thomas, Anirban Sahu, Andre Cassell, Ching-Shih Chen, and Jennifer R. Grandis

**1247 IGF-1R/MDM2 Relationship Confers Enhanced Sensitivity to RITA in Ewing Sarcoma Cells**  
Giusy Di Conza, Marianna Buttarelli, Olimpia Monti, Marsha Pellegrino, Francesca Mancini, Alfredo Pontecorvi, Katia Scotlandi, and Fabiola Moretti

**1257 Identification and Characterization of MEL-3, a Novel AR Antagonist That Suppresses Prostate Cancer Cell Growth**  
Christine Helsen, Arnaud Marchand, Patrick Chaltin, Sebastian Munck, Arnout Voet, Annemieke Verstuuyf, and Frank Claessens

**1269 Dibenzophenanthridines as Inhibitors of Glutaminase C and Cancer Cell Proliferation**  
William P. Katt, Sekar Ramachandran, Jon W. Erickson, and Richard A. Cerione

**1279 An Antibody Fusion Protein for Cancer Immunotherapy Mimicking IL-15 trans-Presentation at the Tumor Site**  
Vanessa Kermer, Volker Baum, Nora Hornig, Roland E. Kontermann, and Dafne Müller

### PRECLINICAL DEVELOPMENT

**1332 Proteasome Inhibition Blocks NF-κB and ERK1/2 Pathways, Restores Antigen Expression, and Sensitizes Resistant Human Melanoma to TCR-Engineered CTLs**  
Ali R. Jazirehi and James S. Economou

**1342 Predominance of mTORC1 over mTORC2 in the Regulation of Proliferation of Ovarian Cancer Cells: Therapeutic Implications**  
Juan Carlos Montero, Xi Chen, Alberto Ocaña, and Atanasio Pandiella
The CXCR2 Antagonist, SCH-527123, Shows Antitumor Activity and Sensitizes Cells to Oxaliplatin in Preclinical Colon Cancer Models

Effect of Small-Molecule–Binding Affinity on Tumor Uptake In Vivo: A Systematic Study Using a Pretargeted Bispecific Antibody
Kelly Davis Orcutt, John J. Rhoden, Benjamin Ruiz-Yi, John V. Frangioni, and K. Dane Wittrup

Glycolytic Inhibition Alters Anaplastic Thyroid Carcinoma Tumor Metabolism and Improves Response to Conventional Chemotherapy and Radiation
Vlad C. Sandulache, Heath D. Skinner, Yuan Wang, Yunyun Chen, Cristina T. Dodge, Thomas J. Ow, James A. Bankson, Jeffrey N. Myers, and Stephen Y. Lai

Correction: Microtubule Inhibitors: Differentiating Tubulin-Inhibiting Agents Based on Mechanisms of Action, Clinical Activity, andResistance

ABOUT THE COVER
The CEACAM1 protein protects melanoma cells from cytotoxic lymphocytes in vitro via homophilic intercellular interactions. Immunohistochemistry of a human lymph node infiltrated with melanoma cells for CEACAM1 (brown pigmentation) and CD8 (pink pigmentation) showed that almost all CD8-positive lymphocytes in the tumor and its close vicinity were CEACAM1⁺, while most lymphocytes in other areas distant from tumor edge were mostly CEACAM1⁻. This strongly suggests that CEACAM1-mediated inhibition occurs in vivo and thus its blockade is a promising strategy for cancer immunotherapy. For details, see article by Ortenberg and colleagues on page 1300.
