Supplementary Figure S1.

[Graph showing tumor weight in grams for different treatments. The x-axis represents the treatment groups: Saline, SynB1-ELP1-Dox, Dox, SynB1-ELP1, and SynB1-ELP2-Dox. The y-axis represents the tumor weight in grams, ranging from 0.0 to 2.4. The graph includes bars with error bars for treatments with and without hyperthermia. Asterisks (*) indicate significant differences between groups.]
