

Highlights of This Issue 219

SMALL MOLECULE THERAPEUTICS

- 221** Folate Receptor–Targeted Polymeric Micellar Nanocarriers for Delivery of Orlistat as a Repurposed Drug against Triple-Negative Breast Cancer
Ramasamy Paulmurugan, Rohith Bhethanabotla, Kaushik Mishra, Rammohan Devulapally, Kira Foygel, Thillai V. Sekar, Jeyarama S. Ananta, Tarik F. Massoud, and Abraham Joy
- 232** Optimization of RGD-Containing Cyclic Peptides against $\alpha\beta 3$ Integrin
Yan Wang, Wenwu Xiao, Yonghong Zhang, Leah Meza, Harry Tseng, Yoshikazu Takada, James B. Ames, and Kit S. Lam
- 241** A Cyclin-Dependent Kinase Inhibitor, Dinaciclib, Impairs Homologous Recombination and Sensitizes Multiple Myeloma Cells to PARP Inhibition
David A. Alagpulinsa, Srinivas Ayyadevara, Shmuel Yacoby, and Robert J. Shmookler Reis

LARGE MOLECULE THERAPEUTICS

- 251** GC1118, an Anti-EGFR Antibody with a Distinct Binding Epitope and Superior Inhibitory Activity against High-Affinity EGFR Ligands
Yangmi Lim, Jiho Yoo, Min-Soo Kim, Minkyu Hur, Eun Hee Lee, Hyung-Suk Hur, Jae-Chul Lee, Shi-Nai Lee, Tae Wook Park, Kyuhyun Lee, Ki Hwan Chang, Kuglae Kim, YingJin Kang, Kwang-Won Hong, Se-Ho Kim, Yeon-Gil Kim, Yeup Yoon, Do-Hyun Nam, Heekyoung Yang, Dong Geon Kim, Hyun-Soo Cho, and Jonghwa Won

CANCER BIOLOGY AND SIGNAL TRANSDUCTION

- 264** 2-Deoxy-Glucose Downregulates Endothelial AKT and ERK via Interference with N-Linked Glycosylation, Induction of Endoplasmic Reticulum Stress, and GSK3 β Activation
Krisztina Kovács, Christina Decatur, Marcela Toro, Dien G. Pham, Huaping Liu, Yuqi Jing, Timothy G. Murray, Theodore J. Lampidis, and Jaime R. Merchan

- 276** RON Nuclear Translocation under Hypoxia Potentiates Chemoresistance to DNA Double-Strand Break–Inducing Anticancer Drugs
Hong-Yi Chang, Ting-Chia Chang, Wen-Ya Huang, Chung-Ta Lee, Chia-Jui Yen, Yuh-Shyan Tsai, Tzong-Shin Tzai, Shu-Hui Chen, and Nan-Haw Chow
- 287** EZH2 Inhibition Blocks Multiple Myeloma Cell Growth through Upregulation of Epithelial Tumor Suppressor Genes
Henar Hernando, Kathy A. Gelato, Ralf Lesche, Georg Beckmann, Silke Koehr, Saskia Otto, Patrick Steigemann, and Carlo Stresemann
- 299** Inhibition of Class I Histone Deacetylases 1 and 2 Promotes Urothelial Carcinoma Cell Death by Various Mechanisms
Maria Pinkerneil, Michèle J. Hoffmann, René Deenen, Karl Köhrer, Tanja Arent, Wolfgang A. Schulz, and Günter Niegisch

COMPANION DIAGNOSTICS AND CANCER BIOMARKERS

- 313** Human Leukocyte Antigen–Presented Macrophage Migration Inhibitory Factor Is a Surface Biomarker and Potential Therapeutic Target for Ovarian Cancer
Andrea M. Patterson, Saghar Kaabinejadian, Curtis P. McMurtrey, Wilfried Bardet, Ken W. Jackson, Rosemary E. Zuna, Sanam Husain, Gregory P. Adams, Glen MacDonald, Rachele L. Dillon, Harold Ames, Rico Buchli, Oriana E. Hawkins, Jon A. Weidanz, and William H. Hildebrand
- 323** Choline Kinase Alpha (CHK α) as a Therapeutic Target in Pancreatic Ductal Adenocarcinoma: Expression, Predictive Value, and Sensitivity to Inhibitors
José M. Mazarico, Victor J. Sánchez-Arévalo Lobo, Rosy Favicchio, William Greenhalf, Eithne Costello, Enrique Carrillo-de Santa Pau, Miriam Marqués, Juan C. Lacal, Eric Aboagye, and Francisco X. Real

MODELS AND TECHNOLOGIES

- 334** Target Identification in Small Cell Lung Cancer via Integrated Phenotypic Screening and Activity-Based Protein Profiling
Jiannong Li, Bin Fang, Fumi Kinose, Yun Bai, Jae-Young Kim, Yian A. Chen, Uwe Rix, John M. Koomen, and Eric B. Haura

Table of Contents

RETRACTION

- 343** Retraction: Pharmacologic Inactivation of Kinase Suppressor of Ras1 Sensitizes Epidermal Growth Factor Receptor and Oncogenic Ras-Dependent Tumors to Ionizing Radiation Treatment

ABOUT THE COVER

Orlistat is a FDA-approved antiobesity drug that shows anticancer effect in a wide range of cancers. However, off-target effects and poor bioavailability hinder its clinical translation as a repurposed new drug against triple-negative breast cancer (TNBC). Orlistat loaded in HEA-*b*-EHA polymeric micellar-nanoparticles improved the solubility, bioavailability, and therapeutic efficacy of orlistat *in vitro* in cells and *in vivo* in tumor xenografts of TNBC in mice. The cover image shows a schematic illustration of the orlistat-loaded HEA-*b*-EHA polymeric micelles with different functional moieties used for tumor targeting (folic acid) and imaging (DyLight-747-*B1*-NIR Dye) in living animals. The results of this study indicate that the orlistat packaged in HEA-*b*-EHA micellar-NP is a highly promising new drug formulation for TNBC therapy. For details, see the article by Paulmurugan and colleagues on page 221.
