

Supplementary Figure 4

Supplementary Figure 4: Effect of AZD5363 on nuclear translocation of AR:

LNCaP and C4-2 were treated \pm with $1\mu\text{M}$ of AZD5363 in the presence or absence of 0.1 nM R1881 for 15min and fixed in methanol/acetone for immunofluorescence staining with anti-AR antibodies. Nucleus is stained with DAPI. In both cell lines treated with AZD5363 or control, R1881 induces nuclear translocation of AR.
