

Figure S1. Telomerase activity in pediatric brain tumor cells MB004, R0315-GBM, SU-DIPG-VI, CCHMC-DIPG-1, D-458, D-425, in normal diploid fibroblast cells HFF and HFF+hTERT, and in osteosarcoma cells Saos2 and U2OS. (-) C, (+) C, and IC indicate negative control, positive control, and internal control respectively. Telomerase products are indicated.
