

**Supplementary Table S3.** Median survival times in a CFPAC-1 peritoneal dissemination model after S-1, TAS-114, or S-1 and TAS-114 combination treatment.

<b>Group</b>	<b>Dose (mg/kg/day)</b>	<b>MST (day)</b>	<b>ILS (%)</b>	
Control	-	53.0	-	
S-1	8.3	51.0	3.7	
S-1/TAS-114	8.3/600	118.0	> 99.2	***#
TAS-114	600	50.0	1.1	

NOTE: The increase in the life span (ILS) was calculated based on the median survival time (MST):

$$\text{ILS} = (\text{MST of treatment group} / \text{MST of control group} - 1) \times 100.$$

\*\* $P < 0.01$  compared with the control group, as determined by the two-sided Wilcoxon test. # $P < 0.01$  compared with the S-1 treatment group, as determined by the two-sided Wilcoxon test.
