

Figure S2 In vitro activation of human PBMC by huA33-BsAb

A. Upregulation of PD-1 on T cells activated by huA33-BsAb in the presence of Colo205 cells after 24 hours (left) and 96 hours (right) on both CD4(+) and CD8(+) T cells. **B.** Absence of T cell division after incubating with SKMEL5 in the presence of huA33-BsAb after 96 hours. **C.** Activation of T cell division by huA3-BsAb in the presence of LS174T cells. **B** and **C** used the same preparation of T cells.
