

Supplementary Figure S3. A. HUH7 tumor-bearing mice were treated with FGF401, sorafenib or vehicle at indicated dose schedules. Values are mean \pm SEM, n=6 mice per group. * $p < 0.05$ using Kruskal-Wallis (Dunn's post hoc) on Δ TVol. B. Hep3B-tumor-bearing mice were treated with one single dose of FGF401 or 6 repeated doses and sacrificed at 2 and 12h (vehicle 2h only) post-dose to analyze tumors by pERK immunohistochemistry C. Analysis of Cyp7a1 mRNA transcript in liver samples at 2h and 12h post-last dose (n=4). 7 α -hydroxy-4-cholesten-3-one (C4) measured by LC-MS in liver (D) and in plasma (E) (n=3).
